STRATEGIES THAT WORK
Intel® Learn Easy Steps for CALD learners

About the project

Intel® Learn Easy Steps for CALD learners: Strategies That Work is a Capacity and Innovation Fund (Round 6) project, developed with the support of the Victorian Government.

The project aim was to develop a better understanding of effective teaching strategies and approaches for using *Intel® Learn Easy Steps* with CALD learners, in order to improve student outcomes and better resource Learn Local teachers using the program.

The project supports the ACFE Board's aim of boosting digital literacy across the state to promote key skills for a digitally connected society t h r o u g h :

- Establishing a Community of Practice to share current pedagogical approaches and methodologies and how these can improve outcomes and results for CALD learner groups accessing *Intel® Learn Easy Steps* training

- Developing a *Strategies that Work* kit, which brings together approaches, resources and tools to support and strengthen the delivery of *Intel® Learn Easy Steps* to CALD learner groups

About the Strategies that Work kit

Strategies that Work is designed to be used in combination with the *Intel® Learn Easy Steps* program, not as a stand-alone resource. Sections can be accessed separately or in full to support planning and delivery.

The resource is divided into general delivery suggestions, specific ideas for modules and three case studies that illustrate some different approaches taken by Learn Local providers delivering *Intel® Learn Easy Steps* to CALD learner groups.

The sections of the resource are:
- Overview Tips
- Instructional Design Notes
- Module 1: Introduction to Computers
- Module 2: Productivity Tools
- Module 3: The Internet, Email, and Communicating Online
- Module 4: Keeping Safe Online
- Module 5: Social Media
- Case Studies
  - Cloverdale Community Centre
  - Keysborough Learning Centre
  - AMES Australia
